

Hussmann Multi-Deck Island Display (RIC-04)

A large 4-tier island merchandiser which can be used for merchandising a variety of products, particularly gourmet foods.

RIC-04 - Refrigerated Multi-Deck Island Display

Introduction

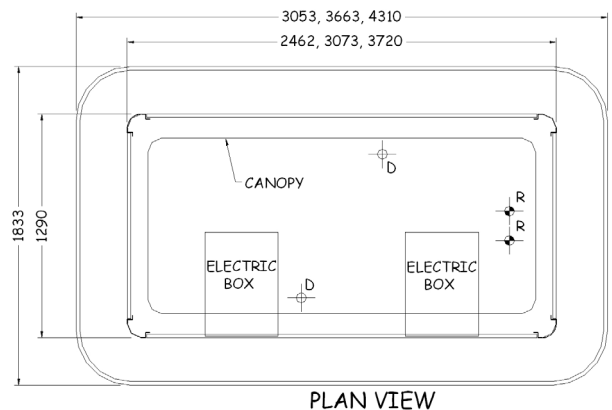

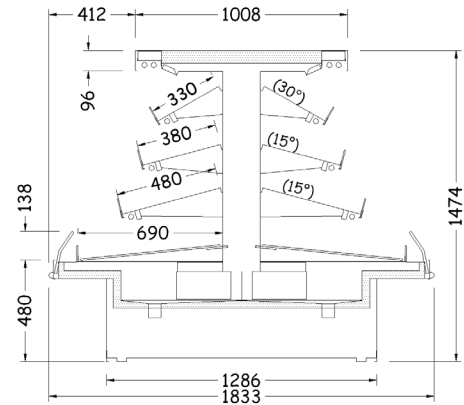

The RIC-04 is a 4-tier, large island merchandiser. It can be used for merchandising a variety of products, particularly gourmet foods. It has curved low plexiglass, with round corners. This allows for excellent visual presentation and easy customer access to all levels.

The case width is standard, but case length is variable. The basic case, up to 3657mm long, is a single unit. Cases longer than this are split into two return cases. These return cases can be used individually at the end of a grocery line. If a wider case is required, the CID island cabinet is available.
