

Botany Town Centre, East Auckland

Scope of Work

AMP Capital Investments have created a whole new type of shopping experience in its design of Botany Town Centre.

Whilst the centre includes all the usual shops found in a shopping mall, its unique layout, and combination of indoor and outdoor areas, make for a very different shopping experience.

McAlpine Hussmann designed and installed all of the airconditioning at the centre.

The project's value was \$6.3M.

Engineering Features

McAlpine Hussmann provided over 12,000 square metres of ducting, 220 split systems, 17 roof packaged units and 55 fans and fresh air units.

- An integrated BMS (Building Management System) for all capital HVAC plant items/system.
- At the time of construction, this won the largest shopping mall in New Zealand.

Project Highlights

The project was split into two stages - first the design and installation of the main base building systems, and second the fitting of grilles, louvres, branch ducting and control systems, to suit individual retail tenancy needs.
