

Specialty

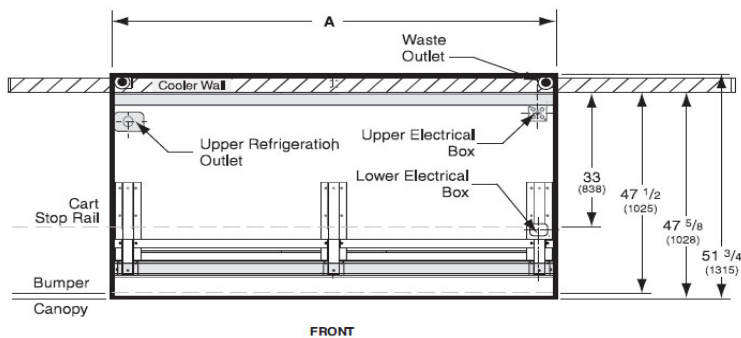

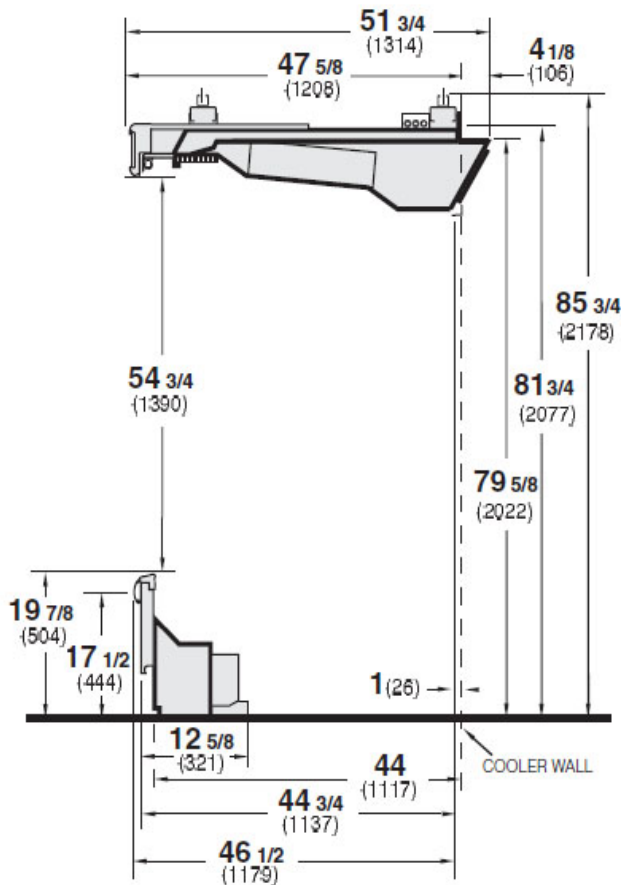

RRIM

Rear Roll-In Dairy Merchandiser

Rear Roll-In Dairy Merchandiser with Suspended Canopy

RRIM

Overall Lengths Dimension A (excluding Ends)

2500mm 3750mm

Each end adds 42mm to the length of the lineup.

Features

The RRIM provides the unique benefit of being stocked from the rear using roll-in milk racks. The case is attached to a walk-in cooler so that the milk doesn't leave its refrigerated environment during stocking.

Curtains are used behind the milk to reduce air currents and shield the walk-in storage from view.

The RRIM has the coil and fan mounted in the top section, which is supported with an open frame which is suspended from above, so frame supports are not needed.

Benefits

- Stocks from rear using roll-in milk racks
- Reduces stocking time
- Attached to walk-in cooler so milk remains cold
- Curtains used behind the milk to reduce air currents and shield view

Standard

- Top suspended refrigerated section
- Lower return air section
- Manual night blinds
- Rear curtains

Options

- Solid ends - required but dependant on case layout for total numbers required
- Integrated night blinds

Additional Information

Dimensions and features are subject to change. Please obtain current information prior to order confirmation.

NOTE: We reserve the right to change or revise specifications and product design in connection with any feature of our products. Such changes do not entitle the buyer to corresponding changes, improvements, additions or replacements for equipment previously sold or shipped.
